

WHAT IS HEMOPHILIA?

Hemophilia is a bleeding disorder that affects one of every 7,500 boys and men from birth. A similar disorder, von Willebrand disease (vWD), affects men and women equally. One of every 100 women lives with vWD. Adults and children with these bleeding disorders experience spontaneous and prolonged bleeding due to the lack of clotting factors in their blood. There is no cure, and treatment to control the bleeding can cost \$350,000 a year or more, every year of their lives.

It's more than most families can readily bear on their own. Because of KHF, they don't have to.

The Kentucky Hemophilia Foundation, or KHF, is the Kentucky Chapter of the National Hemophilia Foundation. We are a private, non-profit organization established in 1960 as a support system for families affected by hemophilia and similar bleeding disorders.

Since our incorporation, KHF has grown into a statewide health agency serving Kentuckiana's bleeding disorders community. KHF's programs and services extend to more than 1,000 families throughout Kentucky and southern Indiana.
